

FAST IMPLEMENTATION AND TRAINING

If you want to get your team up and running quickly with a new technology, our Workshops are for you. Designed for technically savvy organizations who want a fast start, these Workshops are designed to take no more than three days and leave you with fully functioning implementations and the basic training necessary to manage and run the environments.

What's Included

Each workshop is configured to the individual clients' needs. The variation is primarily around the amount of training to be included.

Installation

Generally covers the base implementation and configuration of the new production environment.

- Installation of various software packages
- Review of settings and procedures with your team
- Documentation of all installation settings

Training

Training is adapted based on the objectives and prior experience of the team.

- Feature walkthrough
- Sample project demonstration
- Best practices discussion and demonstration

Focus On: Visual Studio 2005 Team System

VSTS is a powerful development environment for large organizations. The environment can be set up relatively quickly, but can be overwhelming in its breadth of choices and interactions. Our Workshop will:

- Help you navigate through the choices around configurations and roles
- Get you up and running and ready to develop within a day
- Ensure your team takes advantage of the key features of VSTS

Focus On: Microsoft Office SharePoint Server 2007

MOSS 2007 provides a comprehensive platform for enterprise information management, but has so many features that few companies know them all. Our Workshop starts with discovery, allowing Hedgehog Development to tailor the session to your needs. Once scope and relevant areas are determined, we will:

- Explore the key features and capabilities of MOSS 2007
- Configure sample sites and walk through a set of customizations
- Demonstrate the power of integrating MOSS 2007 with the rest of your enterprise
