

HEDGEHOG DEVELOPMENT

# 64 Bit Install Instructions Web Parts

4250 Veterans Memorial Highway  
Suite 3100 West  
Holbrook, NY 11741  
+1.631.676.2186

## 1 Run the Product install

Run the product install MSI. At the end you will receive a message that the install has not completed. Click ok. The files have been added to the install directory for you to complete the install manually.

### Default install directory:

C:\Program Files (x86)\Hedgehog Development\

## 2 Install the HedgehogDevSharePointCommon.wsp (Do This First)

*This only needs to be done once. If you have already installed other Hedgehog Development Webparts you do not need install this again.*

Use the stsadm.exe command located at c:\Program Files\Common Files\Microsoft Shared\Web Server Extensions\12\BIN

### 1. Add the solution

```
stsadm.exe -o addsolution -filename <Drive:\path\to\location\of\HedgehogDevSharePointCommon.wsp>
```

example:

```
stsadm.exe -o addsolution -filename C:\Program Files (x86)\Hedgehog Development\SolutionDeploy\HedgehogDevSharePointCommon.wsp
```

### 2. Deploy the solution

```
Stsadm.exe -o deploysolution -name HedgehogDevSharePointCommon.wsp -immediate -allowgacdeployment
```

## 3 Install the Solution

Use the stsadm.exe command located at c:\Program Files\Common Files\Microsoft Shared\Web Server Extensions\12\BIN

### 1. Add the solution

```
stsadm.exe -o addsolution -filename <Drive:\path\to\location\of\SolutionName.wsp>
```

example:

```
stsadm.exe -o addsolution -filename C:\Program Files (x86)\Hedgehog Development \SolutionDeploy\HedgehogDevSendAsAttachment.wsp
```

### 2. Deploy the solution

```
Stsadm.exe -o deploysolution -name <SolutionName>.wsp -immediate -allowgacdeployment
```

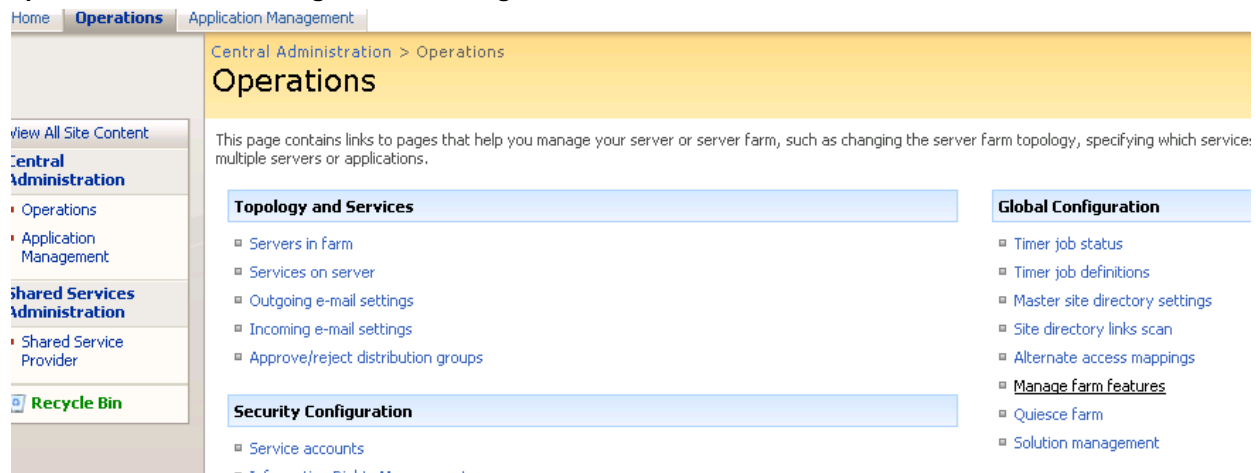

example:

```
Stsadm.exe -o deploysolution -name HedgehogDevSendAsAttachment.wsp -immediate -allowgacdeployment
```

## 4 Activate the Solutions

1. Activate the Farm level feature from SharePoint Central Administration web site

### Operations >>Global Configuration>>Manage Farm Feature

The screenshot shows the SharePoint Central Administration web site. The breadcrumb navigation is "Home > Operations > Application Management". The main heading is "Operations". Below the heading, there is a description: "This page contains links to pages that help you manage your server or server farm, such as changing the server farm topology, specifying which service: multiple servers or applications." There are three main sections: "Topology and Services", "Security Configuration", and "Global Configuration".

- Topology and Services**
  - Servers in Farm
  - Services on server
  - Outgoing e-mail settings
  - Incoming e-mail settings
  - Approve/reject distribution groups
- Security Configuration**
  - Service accounts
- Global Configuration**
  - Timer job status
  - Timer job definitions
  - Master site directory settings
  - Site directory links scan
  - Alternate access mappings
  - Manage farm features
  - Quiesce farm
  - Solution management

2. Locate the Hedgehog Development – Solution and click activate.

### Example:

	<b>Hedgehog Development - All My Tasks Feature Stapler</b> Installs 'Hedgehog Development - All My Tasks' in all newly created MySites.	Deactivate	Active
	<b>Hedgehog Development - Custom MyLinks Menu</b> Activates a custom MyLinks menu on all pages.	Activate	
	<b>Hedgehog Development - Extended Master Page</b> This feature has been obsoleted. It should be disabled.	Activate	
	<b>Hedgehog Development - Farm Event Monitor</b> Monitors the Farm for changes.	Activate	
	<b>Hedgehog Development - List Email Link</b> Adds a link 'mailto:' link to an email enabled list.	Activate	
	<b>Hedgehog Development - Multi-Line Versioned List Filter</b> Improves handling of multi-line text boxes in versioned lists.	Activate	
	<b>Hedgehog Development - Page Hook Control</b> Allows other Hedgehog Development components into the page lifecycle.	Deactivate	Active
	<b>Hedgehog Development - Send as Attachment</b> Enabled sending documents as email attachments on the document Send To menu.	Activate	
	<b>Hedgehog Development - Show Folder Details</b> Show the details page for a folder.	Activate	
	<b>Hedgehog Development - Site Tracker Feature Stapler</b> Installs 'Hedgehog Development - Site Tracker' in all newly created MySites.	Deactivate	Active

## 5 Install the License

At this point you need to download, if you haven't already, the Hedgehog Development license Installer. See Web Site for download information. This is located in the Product information for 64 bit webpart install instructions.

## SHAREPOINT - SEND AS ATTACHMENT

### Problem

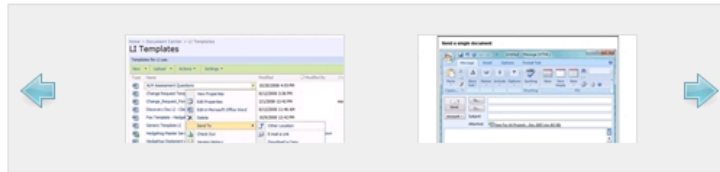

- SharePoint by default does not support emailing documents directly from a document library. In order to email a document you must first save the file locally and then create your email and attach the document manually.

### Solution

- Create 2 links on the document "send to drop down" which will allow the user to automatically attach either a single or multiple documents to their Microsoft Outlook email.

### Features

- Allows you to automatically attach a single or multiple documents to your Microsoft Outlook email by clicking a link.
- This feature is only available when using Microsoft Outlook 2003 or higher.
- Compatible with **Windows SharePoint Services 3.0 (WSS 3.0)** and **Microsoft Office SharePoint Server 2007 (MOSS 2007)**.

### Case Study

"Hedgehog helped me put some faith back into my IT Department and SharePoint. It was challenging for the users to see the tremendous benefits SharePoint has to offer when they were distracted by such a manual process of emailing files. Hedgehog's Send As Attachment immediately added value that the users could see and experience so much so that the brokers requested Hedgehog build us a Send Multiple Attachments Web Part!"

Jimmy Roman, Director of IT for NAI REOC Partners, San Antonio, TX.

### Microsoft Gold Certified Partner

 Hedgehog Development is an award-winning Microsoft Partner, achieving Gold status through our

Run the MSI install on the farm server. After the installation there is a new application in the program menu (Start/All Programs/Hedgehog Development)

Enter the Company Name and Key that was sent to you and select the appropriate product in the dropdown. Now deactivate and re-activate the Hedgehog Development – License Manager feature. In Sharepoint Central Administration > Operations > Manage Farm Features.

Central Administration > Operations > Manage Farm Features

## Manage Farm Features

This page allows you to manage SharePoint-wide features.

Name	Status
 <b>Global Web Parts</b> Installs additional web parts common to all types of sites.	<input type="button" value="Deactivate"/> <input type="button" value="Active"/>
 <b>Hedgehog Development - All My Tasks Feature Stapler</b> Installs 'Hedgehog Development - All My Tasks' in all newly created MySites.	<input type="button" value="Deactivate"/> <input type="button" value="Active"/>
 <b>Hedgehog Development - Farm Event Monitor</b> Monitors the farm for changes.	<input type="button" value="Deactivate"/> <input type="button" value="Active"/>
 <b>Hedgehog Development - License Manager</b> Manages licenses for Hedgehog Products.	<input type="button" value="Deactivate"/> <input type="button" value="Active"/>

You will receive a warning when you try to deactivate the License Manager feature, click Deactivate this feature to continue with the deactivation.

### Warning

 You are about to deactivate the Hedgehog Development - License Manager feature. If you deactivate this feature, any user data or customizations associated with this feature might be lost. In addition, any active features that depend on this feature might fail to function.

[Deactivate this feature](#)

Once the feature has been deactivate, go back to Manage Farm Features and reactivate it.

Central Administration > Operations > Manage Farm Features

## Manage Farm Features

This page allows you to manage SharePoint-wide features.

Name	Status
 <b>Global Web Parts</b> Installs additional web parts common to all types of sites.	<input type="button" value="Deactivate"/> <input type="button" value="Active"/>
 <b>Hedgehog Development - All My Tasks Feature Stapler</b> Installs 'Hedgehog Development - All My Tasks' in all newly created MySites.	<input type="button" value="Deactivate"/> <input type="button" value="Active"/>
